

→ A website similar to Digibate (England)

↓
situation, website, problems, concerns & solutions should be related to Indian school/level.

↓
Cgm, as well as the various undertake differs every few km in the country.

Q8 →
① the social stigma (school & marriage)
↳ parents hide their child's diagnosis from schools or extended families out of fear of isolation.

↓ solution:-

* Add a dedicated "School & Social life" toolkit.
↳ include the presentation/videos for principals/teachers as well as parents and train the students from the initial embarkment.

② Tech ⇒ Accessibility & easy to use.

- ↳ 1. Multi-lingual.
- 2. offline/low data mode.
- 3. WhatsApp integration.

③ financial & resource mapping-

(a) ↳ Comprehensive (test strips, insulin pumps, CGMs) sol.

* "Resources & NGO finders" ⇒ map out govt. / Indian Govt. at state specific - programs providing free insulin, test strips, & NGOs like changing Diabetes in children or (for rural Diabetes foundation)

(b) Combating "Quackery" & fake cures:-

↳ leading to Diabetic ketoacidosis (DKA) sol.

"Myth vs Fact" section endorsed by top endocrinologist.

↳ needs to be gently but firmly address the people why insulin can't be stopped. Avoid dangerous alternative experiments which puts the child in danger and only follow the clinically tested & proven methods for T1D.

★ → FOR CHILDREN ← make the rewards ~~not~~ culturally relatable.

↓
School teachers / school nurses will be taking care of it.

← For adults / teenagers

CUSTOMER > LLM model).
